

PROJECTOR

Standard

Extended

- Fully horn-loaded system comprising four subwoofers and two mid/high units
- 12" / 2" mid/high unit with 2x 300-watt RMS power amp and opto-limiter
- 18" sub with 600-watt RMS power amp with DynaClip™
- 3-way active circuitry with OFR™ technology
- Flyable mid/high units with selector for Medium-Throw and Long-Throw equalization
- Locking PowerCon mains connector

An optional PROJECTOR Tilt Unit is available to better align mid/high units towards the audience. Tilt angles of 5°, 10° and 15° may be selected.

All PROJECTOR components are equipped with 80 mm casters for effortless transport.

Transparent Sound Projection, all the Way to the Last Row

The perfect rig for playing successful gigs in tents, halls, and open-air events, PROJECTOR weds audio expertise gained with big touring rigs to the advantages of HK Audio active systems. Brawny enough for big bass sounds yet ultra-responsive for rendering fine dynamic details, four horn-loaded 18" subwoofers with 600 watts RMS each pack a mighty low-end punch, even over longer distances. Courtesy of a 12" speaker and 2" driver combination, the horn-loaded mid/

high unit ensures complex signals remain clean and articulate all the way to the back row. A truly professional tool, PROJECTOR sports classy details such as rugged 18-mm birch plywood housings, PowerCon mains sockets, and Aeroquip flight tracks on the mid/high units. Compact housings furnished with rugged 80-mm casters make the system easy to roll and a pleasure to set up.

PROJECTOR Mid-High Unit

The fully horn-loaded mid/high unit is equipped with a 12" HK Audio speaker and a coaxially arrayed 2" compression driver feeding a 60° x 40° CD horn. The bi-amped power amp delivers 2x 300 watts output. The speaker's coaxial array creates a tightly focused sound source providing the best prerequisites for precise directivity and accurately detailed resolution. The mid/high unit ships with TÜV-certified Aeroquip flight tracks enabling the enclosure to be flown with utmost safety.

PROJECTOR Sub 2

Packing the powerful punch of a horn-loaded 18" woofer, every PROJECTOR subwoofer delivers considerable low-end sound pressure, even across greater throw distances. The integrated 600-watt RMS amplifier with DynaClip™ Limiter and active crossover OFR™ circuitry dishes up plenty of power and headroom. Though the subwoofers are identical in all other respects, Sub 2 is constructed as a mirror image of Sub 1 to form a large low-frequency horn together.

PROJECTOR Sub 1

Sub 1 is constructed as a mirror image of Sub 2 to form a large low-frequency horn together. And that spells even greater bottom-end sound pressure and throw range.
